Miniature Infrared Temperature Sensor
With Optional High-Ambient Sensing Head
and Touch Screen Display

OS-MINI Series

Models with Display Only
✓ Miniature Sensing Head and Configurable Electronics Module
✓ Screen Color Change Indicates Alarm Mode
✓ Data Logging to MicroSD Card on Touch Screen Models
✓ 4 to 20 mA or RS485 MODBUS® Outputs
✓ Alarm Relay, Outputs Rated 24 Vdc—No Need for Separate Trip Amplifier
✓ Maximum, Minimum, Average and Instantaneous Readings, Peak or Valley Hold, Reflected Energy Compensation

Standard Features for Models with or without Display
✓ High-Ambient Sensing Head Withstands Up to 180°C (356°F) Without Cooling
✓ Adjustable Emissivity Setting—Suitable for a Wide Range of Target Materials Such as Paper, Plastics, Food, Painted Surfaces and Many More
✓ Temperature Ranges from -20 to 1000°C (-4 to 1832°F)
✓ Resistant to Interference from Movement of Sensing Head Cable—Ideal for Mounting on Robot Arms

Optional Mounting Brackets, Air Purge Collar, Laser Sighting Tool and Protective Window
✓ Sensing Head Sealed to IP65

The new OMEGA® mini infrared pyrometer is packed full of exciting new features. Its miniature sensing head measures just 18 x 45 mm (0.71 x 1.8”), making it ideal for mounting in tight spaces. A high ambient version is capable of withstanding temperatures of up to 180°C (356°F) without water or air-cooling, allowing significant energy and cost savings to be made. Manufactured from 316 stainless steel and sealed to IP65, the OMEGA mini sensing head is ideal for food and pharmaceutical applications among many others.

A wide selection of optics allows the OMEGA mini to focus on small or large targets at short or long distances. The special low-noise interconnecting cable is resistant to interference from movement, making the sensing head ideal for mounting on robot arms. It can be supplied in lengths from 1 to 30 m (3.3 x 98'). The electronics module is also available with a number of different options: The backlit touch screen interface provides a large, bright display of the measured temperature in digital format and a graph view that shows the history of the measured temperature. It also enables full configuration of
the sensor including temperature range setting between -20 to 1000°C (-4 to 1832°F), adjustable filtering, peak or valley hold processing, emissivity setting and reflected energy compensation. In alarm conditions, the whole display changes color to provide an immediate and obvious alarm indication. Alarm modes and levels can be configured via the touch screen. When fitted with a MicroSD card, the OMEGA mini also functions as a data logger, providing a useful means of recording process temperatures for quality assurance and traceability. The user can select the sample rate and the number of samples to be taken and schedule the data logging to start at a certain time. With a 2 GB card, the user can store 28.4 million time and date stamped readings, which provides almost 1 year’s worth of data at the fastest possible sample rate of 1 per second.

Output options include 4 to 20 mA, RS485 MODBUS and alarm relays, which are rated 24 Vdc so there is no need for a separate trip amplifier. Other options include mounting brackets, an air purge collar, protective lens cover and laser sighting tool.
Specifications

Maximum Temperature Span
(Touch Screen Models):
1020°C (1888°F)

Minimum Temperature Span
(Touch Screen Models):
100°C (212°F)

Output: 4 to 20 mA or RS485 MODBUS

Accuracy: ± 1°C or 1%, whichever is greater

Repeatability: ± 0.5°C or 0.5%, whichever is greater

Emissivity Setting Range: 0.20 to 1.00

Emissivity Setting Method:
MA Models: Via two rotary switches in electronics box
MODBUS Display Models: Via RS485; via touch screen

Response Time, 190: 240 ms
(90% response)

Spectral Range: 8 to 14 μm

Supply Voltage: 24 Vdc ± 5%

Maximum Current Draw: 100 mA

Maximum Loop Impedance
(MA and MA-R-D Models):
900 Ω (4 to 20 mA output)

Alarm Relays (MA-R-D and CR-R-D Models): 2 x single pole changeover alarm relays rated 24 Vdc, 1 A, isolated 500 Vdc

Cable Length (Sensing Head to Electronics Module): 1 m (3.3') (standard), up to 30 m (98.4') (optional)

Ambient Temperature (Sensing Head): 0 to 60°C (32 to 140°F)

Weight with 1 m (3.3') Cable:
Approximately 390 g (14 oz)

Cable Connections:
Removable screw terminal blocks (see connections diagram to right)

Conductor Size: 28 to 18 AWG

Output Cable Gland: Suitable for cable diameters 3.0 to 6.5 mm

Sensing Head: 316 stainless steel (see diagram on previous page)

Dimensions: Ø18 x 45 mm

Mounting: M16 x 1 mm thread

Electronics Module: Die-cast aluminum

Dimensions: 98 W x 64 H x 36 mm D (3.9 x 2.5 x 1.4")

Mounting: Two M4 screws for wall mounting (see diagram on previous page)

Connections

MA and MA-R-D

C4 and C4-R-D

OMEGACARE™ extended warranty program is available for models shown on this page. Ask your sales representative for full details when placing an order. OMEGACARE™ covers parts, labor and equivalent loaners.

Comes complete with sensing head and 1 m (3.3’) cable and operator’s manual. Display models come with 2 GB microSD card with SD card adaptor.

* To order, specify model number, temperature range, output and interface, for an additional cost.

** To insert cable length in meters. Extended cable is added to standard cable length, add suffix to model number, for an additional cost.

*** To order, add suffix “-PWS” to model number, for an additional cost.

**Ordering Examples:**

- **OS-MINI152-D-MA**, miniature infrared temperature sensor with 15:1 optics, touch screen and configurable temperature range from -20 to 1000°C (-4 to 1832°F).
- **OS-MINI302-MA-XT**, miniature infrared temperature sensor with 30:1 optics, 4 to 20 mA output and fix range from 0 to 1000°C (32 to 1832°F).
- **OS-MINI-HA201-D-C4**, miniature infrared temperature sensor with high ambient sensing head and 20:1 optics, RS485 MODBUS, relay and touch screen. **OCW-3, OMEGACARE** extends standard 2-year warranty to a total of 5-year warranty.
- **OS-MINI152-MA-MT-MINI-PMCE-(3)**, miniature infrared temperature sensor with 15:1 optics, 4 to 20 mA output, 0 to 250°C (32 to 932°F) range and 3 m (10’) of extension cable.
More than 100,000 Products Available!

- **Temperature**

- **Flow and Level**
  Air Velocity Indicators, Doppler Flowmeters, Level Measurement, Magnetic Flowmeters, Mass Flowmeters, Pitot Tubes, Pumps, Rotameters, Turbine and Paddle Wheel Flowmeters, Ultrasonic Flowmeters, Valves, Variable Area Flowmeters, Vortex Sheddng Flowmeters

- **pH and Conductivity**
  Conductivity Instrumentation, Dissolved Oxygen Instrumentation, Environmental Instrumentation, pH Electrodes and Instruments, Water and Soil Analysis Instrumentation

- **Data Acquisition**
  Communication Products and Converters, Data Acquisition and Analysis Software, Data Loggers, Plug-in Cards, Signal Conditioners, USB, RS232, RS485, Ethernet and Parallel Port Data Acquisition Systems, Wireless Transmitters and Receivers

- **Pressure, Strain and Force**
  Displacement Transducers, Dynamic Measurement Force Sensors, Instrumentation for Pressure and Strain Measurements, Load Cells, Pressure Gauges, Pressure Reference Section, Pressure Switches, Pressure Transducers, Proximity Transducers, Regulators, Pressure Transmitters, Strain Gauges, Torque Transducers, Valves

- **Heaters**
